### REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: Claims 1, 3, 12, 16 and 19 are patentable over the prior art patents and printed publications because of the specific structure of the carriage of the printing system, which includes a body having a bearing structure to support the carriage for movement along a reference rail, a printhead carrier anchored to the carriage body and datumed relative to the carriage body, through a single region, both translationally and rotationally to plural orthogonal reference axes, and a printhead anchored to the printhead carrier, and aligned to the carriage bearing structure. The combined limitations are not taught by the art of record alone or in combination.

Claim 20 is patentable over the prior art patents and printed publications because of the specific method of aligning a printhead relative to a print-zone in a printing device by selecting surfaces of a carriage body to be carriage body datuming surfaces, selecting surfaces of a printhead carrier to be printhead carrier datuming surfaces, and orienting the carriage body datuming surfaces relative to the printhead carrier datuming surfaces whereby confronting contact between adjacent pairs of such datuming surfaces will be effective to produce translational and rotational datuming of the printhead carrier relative to the carriage body with respect to plural orthogonal reference axes. The combined limitations are not taught by the art of record alone or in combination.

Claim 21 is patentable over the prior art patents and printed publications because of the specific method of assembling a carriage for a printing device, the method comprising datuming the printhead carrier relative to the carriage body, datuming an ink-supply system relative to the carriage body in fluid communication with the printhead carrier, anchoring the printhead carrier to the ink-supply system with the carriage body intermediate the printhead carrier and the ink-supply system, mounting the printhead on the printhead carrier, and aligning the printhead relative to the carriage bearing structure. The combined limitations are not taught by the art of record alone or in combination.

Claims 4-7, 9-11 and 17-18 are allowed because they are directly or indirectly dependent from claims 3, 12 and 16 above.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
